## Student Evaluation of Teaching Results - Fall 2020

Thomas W Mattman,

Enclosed you will find the results of the Fall 2020 Student Evaluation of Teaching (SET) for your course:

2208\_MATH\_120\_07\_1 - Analytic Geometry and Calculus

The SET form administered was SETForm\_U.

An overall indicator is listed first. It consists of an average of the following scales:

- Part B

The overall indicator is followed by the individual average values of the scales mentioned above. In the second part of the analysis the average values of all individual questions are listed. Written comments (if any) will follow the individual question analysis.

If you have any further questions do not hesitate to contact the Office of Institutional Research.

1. **General Information**

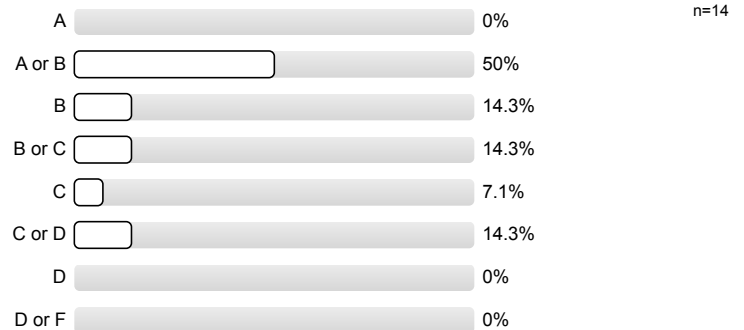

1.1) **You are a:**

1.2) **Is this course:**

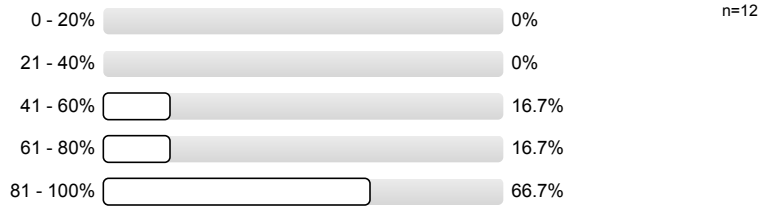

1.3) **Expected Grade:**

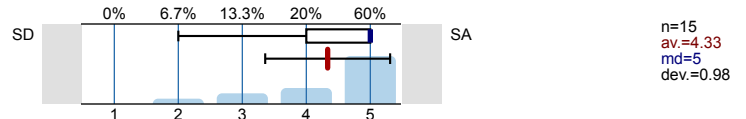

**2. Part A** Mark the answer that best applies.

2.1) How well are you keeping up with the assignments and reading for this course? (Give a percentage estimate)

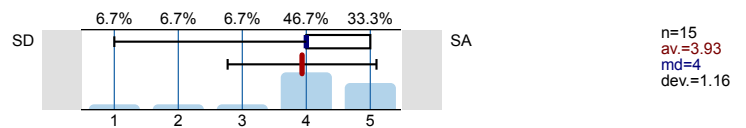

**3. Part B**

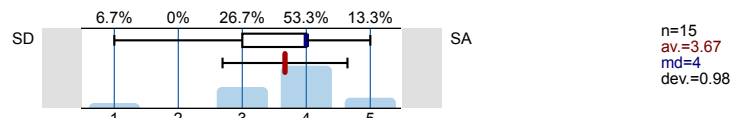

3.1) The syllabus explains course requirements.

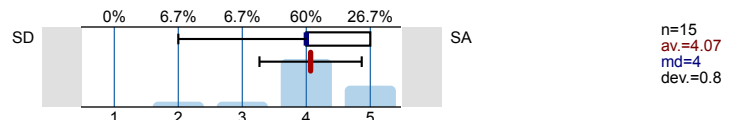

3.2) My overall knowledge of the subject matter has increased due to the instruction of this course.

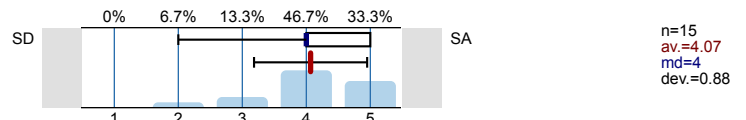

3.3) The instructor presents the material in an understandable way.

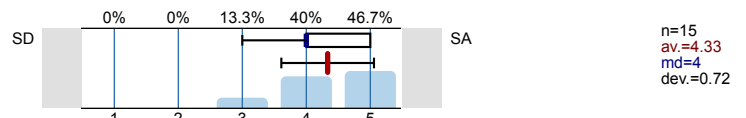

3.4) The instructor is well prepared for class.

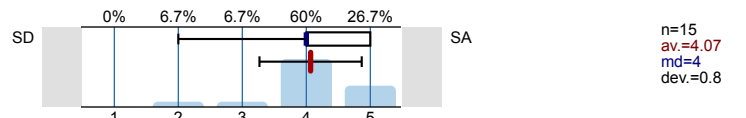

3.5) The instructor follows the course syllabus.

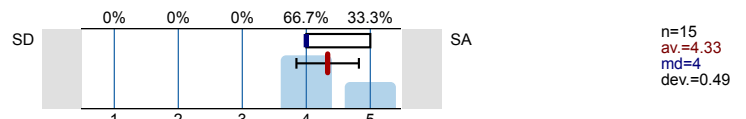

3.6) The instructor is available during office hours.

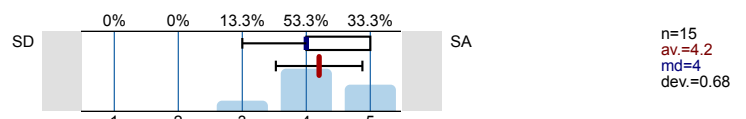

3.7) The course assignments contribute to learning.

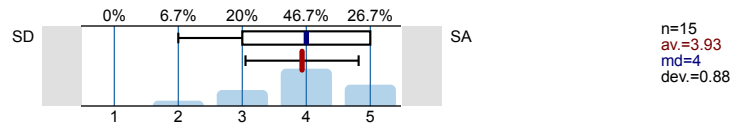

3.8) The instructor gives appropriate feedback.

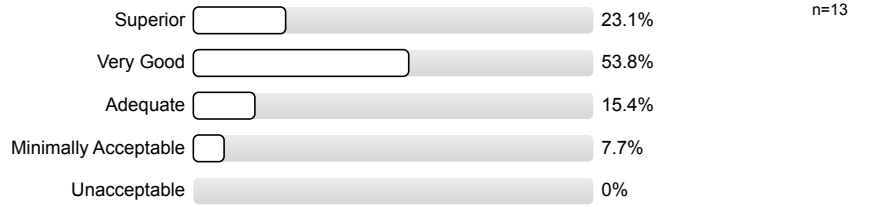

3.9) The instructor communicates high expectations for student achievement.

3.10) The instructor monitors student learning throughout the course.

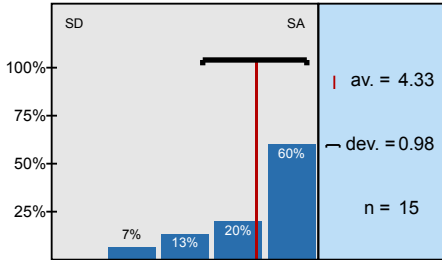

3.13) How do you rate the overall quality of teaching in this class?

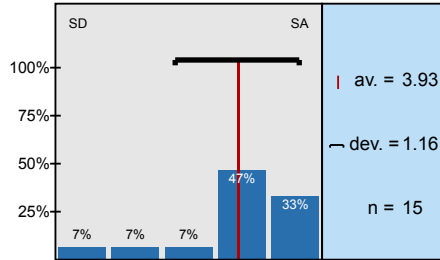

# Histogram for scaled questions

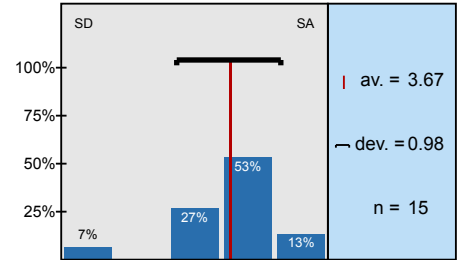

The syllabus explains course requirements.

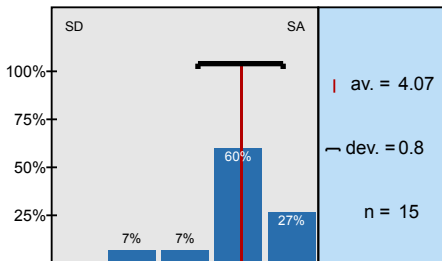

My overall knowledge of the subject matter has increased due to the instruction of this course.

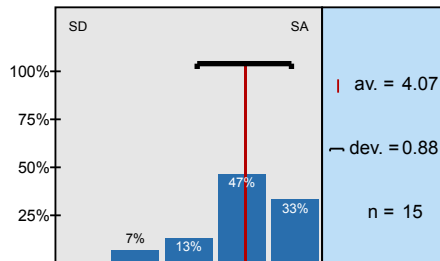

The instructor presents the material in an understandable way.

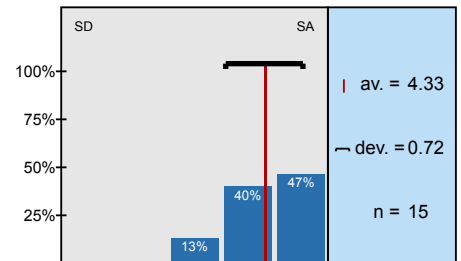

The instructor is well prepared for class.

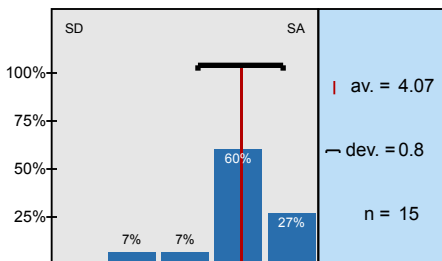

The instructor follows the course syllabus.

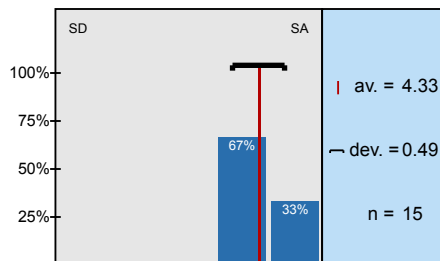

The instructor is available during office hours.

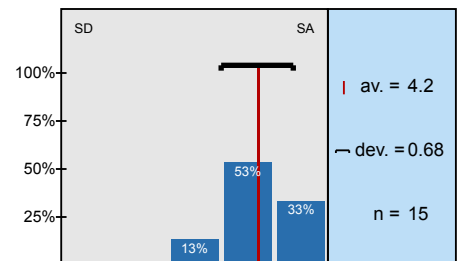

The course assignments contribute to learning.

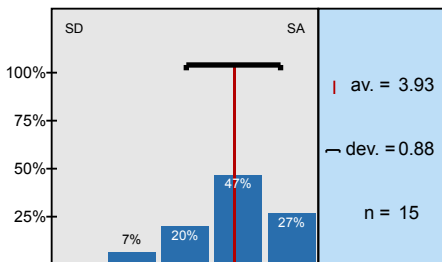

The instructor gives appropriate feedback.

The instructor communicates high expectations for student achievement.

The instructor monitors student learning throughout the course.

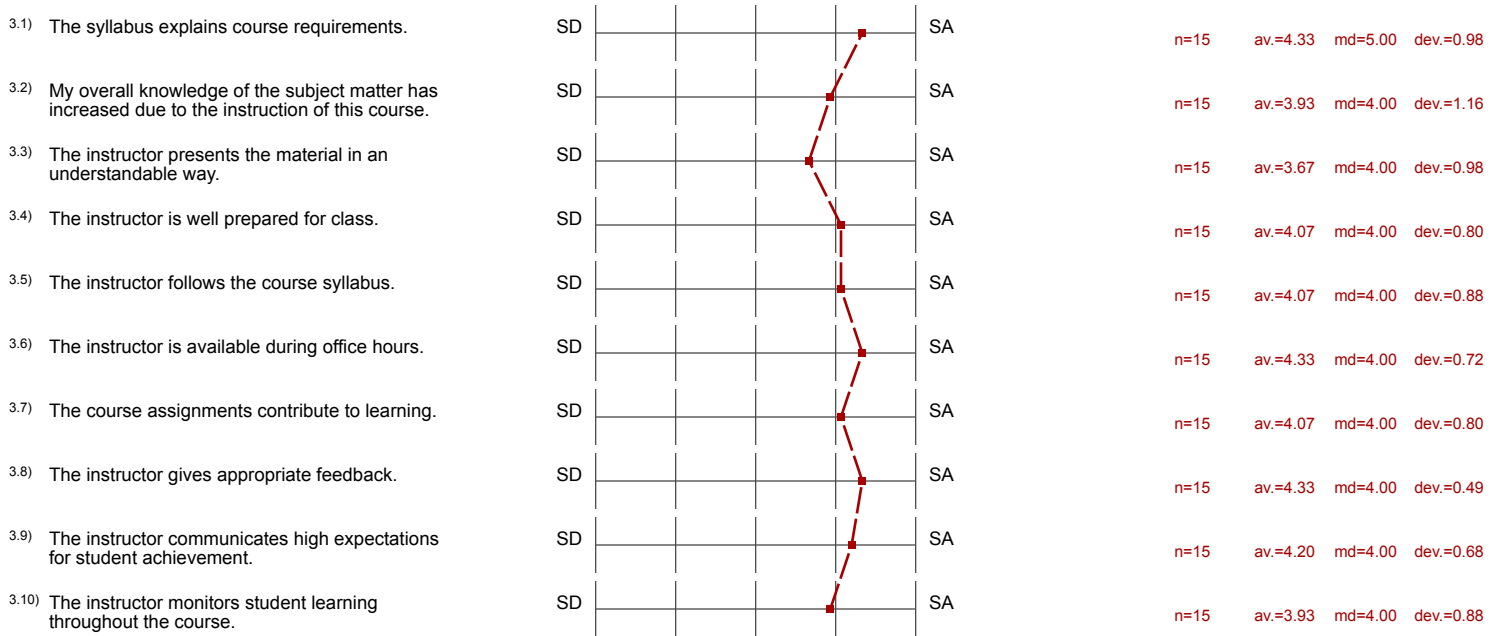

# Profile

Subunit: NSC - Mathematics and Statistics  
 Name of the instructor: Thomas W Mattman  
 Name of the course: Analytic Geometry and Calculus  
 (Name of the survey)

Values used in the profile line: Mean

## 3. Part B

## Comments Report

### 3. Part B

3.11) What did your Instructor do to make this class a good learning experience for you?

- Encouraging collaboration during zooms with worksheets was a great choice.
- Going over the hw before it was due really helped with understanding it.
- Good explanations when people are misunderstanding the concepts we are learning at the time.
- He gives us plenty of resources in order so we can understand each topic. Due to not given so much time he gives us videos to watch before class in order to get a better understanding of each topic.
- He usually put us in a breakout room to solve the worksheets.
- He was always there if we had questions or needed clarifications.
- Helped with homework assignments.
- I enjoyed his class very much, he does give a lot of homework but it helps me to keep up with the practice, but overall, the content is given in a great way.
- I liked how the hw problems were well explained in detail which made it easier for me to understand my hw problems for the day.
- Professor Mattman made this class really fun with helping us everyday on the homework and guiding us step by step through a problem. He is always available to help and during class does his best to help everyone he can on everything that is asked and brought up. He also allows us to interact with other people in class with breakout rooms and we work together on a worksheet which is great.
- The project helped me learn a lot, but he barely teaches any of the materials himself.
- Well structured weekly schedule of 1 day for projects, rest are normal.

3.12) What could your instructor do in the future to make this a better class?

- Go more over the lectures instead of having us do group assignments all the time. His recorded lectures are fine but it just hits different when you're there in person taking notes.
- He could have a bit more energy.
- He could make the notes more understandable and do more examples.
- He could maybe add a day to lecture, instead of just jumping to the ways to answer the homework, sometimes the videos are not as clear as possible or sometimes we like to have a day for him to lecture.
- I really don't know how you could improve this class, it's sort of straight forward and a class that has a great routine.
- I think that if Mattman used a lot better websites because to me WEBWORK and PROCTORIO are some pretty sketchy sites to me, but I don't have a problem with it because he tells us before hand of what he will be using for the class.
- Maybe if he make clear videos in BBL that will be perfect.
- More lectures during class, and less groupwork.
- No comments.
- Please teach us the materials more during the class time.
- The class is good just as it is.
- Try to teach more concepts within class instead of having us try to learn the concepts before class. It's more difficult in my opinion when you haven't learned concepts and are being taught by a video. Although, I can understand why he does this because of the lack of time due to online school.

3.14) **IMPORTANT:** Please give at least one reason to justify your rating.

- Did not like how all the learning had to be done outside of class.

- He always answers our questions and makes good notes.
- He can be too mellow but he explains things well.
- He clearly knows what he's doing and explains the subject matter very well.
- He is a great instructor and explains each topic very well. When we have questions he answers all our questions and makes sure we understand the topic before moving on. If we still don't understand it still he goes over it again.
- I enjoyed his content and the enthusiasm given from the professor.
- I hope that you can personally guide us through "how to" in each examples more from the ground up by explaining the formulas and the theory a little bit more.
- I liked how you were able to extend deadlines of hw assignments based on students' results and how understandable you were. Thank you!
- I'd say Professor Mattman overall does quite a good job and is good at explaining most concepts.
- I've know some bodies who have same as my opinion.
- Professor Mattman is a great instructor and he thoroughly introduces the topics provides videos on the general overview of the topic and another video of worked examples of the topic, which is very helpful. He truly cares about the learning of the student and he helps them in any way they can, thank you!
- Professor taught the material in an understandable and easy way.
