Student Evaluation of Teaching Results - Spring 2017

Thomas W Mattman,

Enclosed you will find the results of the Spring 2017 Student Evaluation of Teaching (SET) for your course:

2023_MATH_217_02_01 - Discrete Math - Discussion

The SET form administered was SETForm_U.

An overall indicator is listed first. It consists of an average of the following scales:

- Part B

The overall indicator is followed by the individual average values of the scales mentioned above. In the second part of the analysis the average values of all individual questions are listed. Written comments (if any) will follow the individual question analysis.

If you have any further questions do not hesitate to contact the Office of Institutional Research.

3. Part B

3.11) What did your Instructor do to make this class a good learning experience for you?

- Answer questions
- He explained things at a very technical level which can be hard to understand initially but in the end is the best way for me to learn.
- Made it clearly related to computer science, knowing this material in and out is a benefit to my major
- The lessons were understandable and gave assignments in class so that we could get some practice with the materials.
- Very organized class sessions and written material on board. Use of LAs was spectacular. I loved the study sessions outside of class conducted by the LAs.

3.12) What could your instructor do in the future to make this a better class?

- He is already doing a great job.
- Keep having LA's offer study sessions, and help out during in class study, reduce the percentage of HW to overall grade.
- More jersey days:)
- More lecture time; groupwork helps to a degree but the balance seemed to take away from illustrative examples that might have been provided in lecture.
- Not sure it is an odd subject and moves all over the place I thought he did a great job teaching the class.

3.14) **IMPORTANT:** Please give at least one reason to justify your rating.

- He was always prepared, could answer all my questions.
- Instructor knows material well and allows in class practice of the material relative to the exams.
- It's been difficult to learn new concepts in this class. I feel like either the concepts could be explained more, or more examples given before we're expected to be able to do it on our own.
- Lessons were understandable and he was well prepared for every class.
- This course has greatly enhanced my abilities within my major
- Understand Material Well
